BIMLABS Stuido Pvt Ltd

BIM Services | CAD Services

About Us

BIMLABS Studio provides BIM consulting/Modeling services which undertake detailed strategic BIM implementations aimed at property owners and facility operators to reveal the opportunity of BIM and to make a business case for improved lifecycle management and operations.

The success of our projects is built on providing a great service and applying our knowledge of the latest research and innovation. We seek to add value by going beyond the brief and really understanding the nature of our client's business. Through the establishment of a structured project framework BIM Studio will provide an outcome of the highest quality for any organization seeking to implement a digital evolution in their business.

Why Us?

With the shift in the construction industry from AutoCAD to BIM, there has been an increasing demand from all around the globe for BIM services, which mostly consist of BIM drafting, BIM modeling, clash detection, BIM coordination and other pre-construction designing services. Bimlabs Studio offers customized BIM drafting services that suit the particular needs and demand of the clients. Construction managers, MEP engineers, structural engineers, architects, contractors, subcontractors, owners, facility managers and project managers approach us for efficient BIM drafting services. We provide cost-effective BIM services that help make our clients' costs more competitive.
